

## **Public Policy and Communications Training Webinar Opportunity**

The American Institute of Biological Sciences (AIBS) runs in person and online training sessions. This may be of heightened interest for our members at this time.

A 2-hour training webinar, run by AIBS, covering topics such as (1) science policy 101; (2) basics of effective communication with lawmakers; (3) an overview of what's going on right now; and (4) talking points + script + avenues for engaging with congress, would cost **\$1,500 and could host up to 200 individuals.**

If the BSA Board is interested, perhaps cost could be shared by ASPT or another plant related scientific society that has interest.

Are we interested and willing to bear the \$1500 charge?
